

Simón Morales Lozano

Software Developer / C++ & Game Developer

Software Developer specialized in C++ and game development, with hands-on experience in AAA systems, VR environments, and high-performance logic. Strong background in Computer Engineering foundations, UI/UX design, and memory management. Passionate about building software, interactive experiences, and intuitive user interfaces.

EDUCATION

2020 - 2021
Instituto Tecnológico de Buenos Aires (ITBA)

Advanced Python Course
Libraries management, scripting and task automation.

2020 - 2022
Universidad Católica Argentina (UCA)

Computer Engineering
Foundations of programming, data structures, algorithms, logic and databases.

2022 - Present
Universidad Argentina de la Empresa (UADE)

Bachelor's Degree in Game Development
Design and development of video games, production, interactive storytelling, digital art, game design, project management and team work.

EXPERIENCE

2024 - 2025

Web Developer
- **Maintained and optimized corporate websites**, ensuring functional consistency and implementing visual design updates.

2024 - 2025

Community Manager
- **Managed social media platforms** and created visual content strategies for corporate communication.

2025

Unity/VR Developer
- **Developed an immersive virtual reality experience** set in an oilfield environment, focusing on UI design and creating an intuitive, accessible gameplay flow for casual users.

2026

Game Developer | Globant
- **Implemented UI components and Gameplay logic** using a proprietary node-based visual scripting system, ensuring functional alignment with design specifications.
- Applied targeted training in color theory and user experience to **UI/UX development**, creating highly intuitive and visually cohesive interfaces.
- **Completed advanced coursework in Unreal Engine and C++**, strongly emphasizing system architecture and robust memory management techniques.
- **Configured specialized AI agents** using a proprietary platform to act as C++ development assistants, streamlining coding tasks and accelerating technical learning.

SKILLS

- **Game development**
  - Unity
  - Unreal Engine
  - Level Design
  - Gameplay Balancing
- **Programming**
  - C#
  - C++
  - Python
  - JavaScript
  - HTML
  - CSS
- **Design & Art**
  - Blender
  - Adobe Creative Cloud
  - UI/UX design
- **Communication & Management**
  - Social Media Management
  - Community Management
- **Development tools**
  - GitHub / Gitlab
  - Visual Studio
  - Trello / Notion
- **Soft Skills**
  - Problem Solving
  - Self-Learning
  - Communication
- **Languages**
  - **Spanish:** Native
  - **English:** Advanced
